## Side cameras

**Purpose:** There are 2 side cameras on each side of the glasses. They record the pupils of the wearers.

The PCB controlling the cameras are located on the right side of the wearer's glasses.

## Features

- Small and compact
  - 6mm \* 6mm \* 4mm
- Keeps track of wearer's pupils
- 2 cameras on each side of the glasses
- Works even on low light situations.
  - The eye recordings are uploaded to the cloud, and the software transforms the original recording into black and white.
